Subcategory ID

Subject User groups and billing issue.

Description of Problem or Suggestion:

A user belongs to several groups (i.e., has been approved to "acquire" several different types of restricted data - example from several DAACs). When that user places an order, they should be presented with a list of groups they are members of, so they can select which group(s) to have the request/order billed to.

Originator's Recommendation

Make sure the design accommodates the above.
